

Q: How would you like to share the problem statement? A: I am a Agentic AI consultant and preparing for a workshop for Finance Community of a multinational Investment Bank and I want to cover listed topics: I want to create deck of 3 slides. Slide 1. Slide should be able to explain what is Agentic AI; It should have an innovative Infographics which can help any non tech person to understand the Agentic AI and its capability. You can also include a practical example to explain the Agentic AI solution. Please ensure that slide is very informative and rich and great quality with a professional colour theme and should look classy. What is Agentic AI, please note that this Slide is for Finance team members who might NOT be having any background of this topic and also not tech savvy. So keep the content very simple to digest, use less text and more infographics, no technical jargons and share an example to make this explanation easy. Slide no. Slide 2: To continue the story we need to create a infographics to explain the complete circle of all components of the Acetic AI solution approach to solve any problem. Trigger: Starting from Human provides the instruction Context Understanding/Setting of Goal: How Agentic AI solution Analyse the problem, understand the context Perception: How genetic AI perceive the data available in the memory and complete the analysis part Planning/Resoning: How it Plan the sequence of steps and resources required to execute the solution to achieve the goal Memory: Role of memory in Agentic AI Solution. How Agentic AI solution utilises memory to perform better. Brain of Agentic AI Solution: Role of LLM in agentic AI solution (Should be in the centre of the solution Execution: Role of various Tools to execute the plan Learning: How Agentic AI solution learn from the feedback (Human Intervention decision) and how this memory will be used in future autonomous decision making Use the Financial problem example mentioned in Slide 1 and explain the same that how this problem gets solved by Agentic AI solution by mentioning the action perform by each component of the solution. Slide 3. Slide should be able to explain how Agentic AI is different than Traditional AI, GenAI, RAG solutions. Please use an example to explain this difference and use more infographics than text. Don't use technical jargons. Use similar Banking related use case to explain what outcome we can expect using Traditional AI, GenAI, RAG and Agentic AI. You should also mention the Autonomous Score of these 4 AI based solutions. Please ensure that all 3 slides are following same theme and have very professional tone and infographics are very mature and polished. Do NOT take references of too many tehcnical Jargons Use less text and more infographics Use professional colour palette to produce these 3 slides. Prepare these deck in PPT format which can be edited for the minor touch ups.
